**Re: 5th Quarterly Status Report
PCB Remedial Action
Arsynco, Inc. Site
Carlstadt, New Jersey**

Dear Mr. Mazzucca:

In accordance with Section 5 of the USEPA's *Approval for Risk-Based Clean-up/Disposal of Polychlorinated Biphenyl Remediation Waste* for the Arsynco site, which became effective on July 21, 2009 (the "EPA Approval"), the following provides the 5th Quarterly Status Report of the PCB remedial action at the Arsynco facility.

The following activities/actions have occurred in relation to the site since the 4th Quarterly Status Report was submitted to EPA on August 6, 2010:

- Arsynco secured the required permits and approvals, performed the utility disconnects and completed the demolition of the remaining buildings on the site in preparation of the required site remediation work.
- Arsynco prepared an amended version of the text of the September 2009 Engineering and Monitoring Plan (EMP) to address comments contained in EPA's letter dated March 25, 2010. This amended document was submitted to EPA on August 12, 2010.
- Arsynco is in the process of preparing a more detailed sampling plan for the PCB remediation efforts, as requested by EPA in their March 25, 2010 letter. Arsynco intends to submit this plan to EPA under separate cover as an appendix to the EMP.
- Arsynco has prepared draft TSCA financial assurance documents that are under review by Arsynco's financial institution. Arsynco has further sought guidance from EPA on certain aspects of those documents. Arsynco expects to finalize and execute these documents such that the TSCA financial assurance will be established by December 31, 2010.
